Manufacturer public statement

We **Ananta Apparels Ltd**. Plot#97-101 have set a greenhouse gas emissions target covering our scope 1&2 emissions in line with the latest criteria and recommendation of the SBTi which supports the ambition of the Paris Agreement in limiting global temperature rise to 1.5 degree Celsius above pre-industrial levels.

Baseline Year	Target Year	% of emissions reduction target
2023	2033	54.6%

We, **Ananta Apparels Ltd.**, have been working with one of our customers (Global Band) to understand and address our scope 3 emissions.

We confirmed that the Tier 1 and Tier 2 Manufacturing sites we contract with have set greenhouse gas emissions reduction targets covering the manufacturing sites Scope 1 & 2 emissions, in line with the criteria and recommendations of the SBTi.

Plot No. 97-101, Adamjee Epz,
Siddhirganj, Narayanganj, Bangladesh.

Corporate Near-Term Tool

Version: 2.3
Support: info@sciencebasedtargets.org

Scope 1&2 Tool User Guide

Section 1: Input emissions and activity data as required by the selected Target Setting Method. Required input fields are highlighted in yellow.
Section 2: Summary of emissions reduction target data and visualizations, Sector-specific intensity convergence / Sectoral decarbonization approach (SDA).
Section 3: Summary of emissions reduction target data and visualizations, Cross-sector absolute reduction / Absolute contraction approach (ACA).
Section 4: All target modelling output data, SDA & ACA.

Section 1. Input data

Enter your company name	Ananta Apparels Ltd.	
Target setting method	Absolute Contraction Approach	*This approach is not applicable to power generation emissions*
SDA scenario		*Not applicable*
SDA sector		*Not applicable*
Base year	2023	*Select a base year*
Base year	A	
Base year	1,826	tCO2e
Base year	1,217	tCO2e
Target year	2033	*Select a target year*
Target year	N	
Target year	A	
Most recent year (MRY)	2023	*Select most recent year of available emissions&activity data*

Please see results in Section 3 below

IMPORTANT NOTICE:

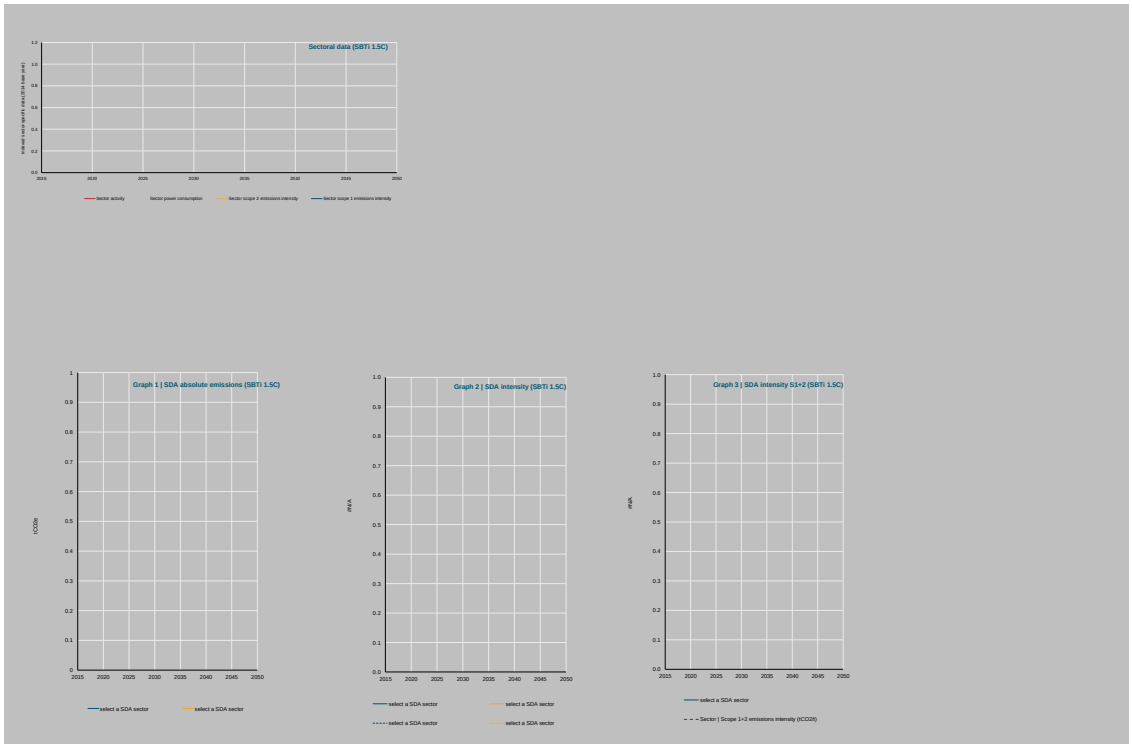
This Tool is intended to support companies in their modeling of science-based emissions reductions targets, as well as to assist companies and interested third parties in assessing and evaluating companies' targets. How-ever, to be approved by the Science Based Targets initiative, companies need to make sure their target(s) fulfill the SBTi criteria. Please review the SBTi Step by Step Process to access the latest criteria and resources: https://sciencebasedtargets.org/step-by-step-process

Also please note that the SBTi assesses "lone and-looking" ambition of target(s) by using the year the target is submitted to the initiative (or the most recent GHG inventory). For further information, consult the SBTi Corporate Net-Zero Standard: https://sciencebasedtargets.org/resources/files/Net-Zero-Standard-Criteria.pdf

Please help us improve this tool by reporting issues related to functionalities and formatting.

Update notification:
Please note that as of July 15th 2022, SBT Tool versions 1.2.2 and earlier are no longer supported. For clarifications on tool version eligibility please contact info@sciencebasedtargets.org.

Section 2. Sector-specific intensity convergence / Sectoral decarbonization approach (SDA)

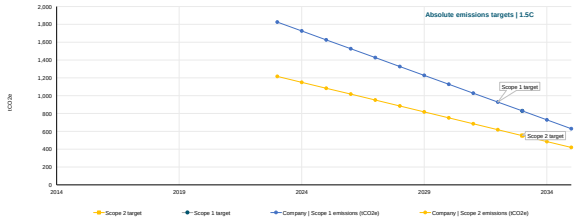


Section 3. Cross-sector absolute reduction / Absolute contraction approach (ACA)

1.5 degree scenario (1.5C)

Review all target modelling data

	Base year (2023)	Same as base year	Target year (2033)	% Reduction to date	% FLA Adjustment	% SBT reduction		
Scope 1 emissions (tCO2e)	1,826	-----	829	-----	Not required	54.60%	Near-Term Scope 1 SBT Formulation	Ananta Apparels Ltd. commits to reduce Scope 1 emissions 54.6% by 2033 from a 2023 bas
Scope 2 emissions (tCO2e)	1,217	-----	552	-----	Not required	54.60%	Near-Term Scope 2 SBT Formulation	Ananta Apparels Ltd. commits to reduce Scope 2 emissions 54.6% by 2033 from a 2023 bas
Scope 1+2 emissions (tCO2e)	3,042	-----	1,381	-----	-----	54.60%	Near-Term Scope 1+2 SBT Formulation	Ananta Apparels Ltd. commits to reduce Scope 1+2 emissions 54.6% by 2033 from a 2023 ba



Section 4. All target modelling data

		2023	2024	2025	2026	2027	2028	2029	2030	2031	2032	2033	2034	2035
Absolute contraction | 1.5C	Scope 1 emissions (tCO2e)	1,825.79	1,726.10	1,626.42	1,526.73	1,427.04	1,327.35	1,227.66	1,127.97	1,028.29	928.60	828.91	729.22	629.53
	Scope 2 emissions (tCO2e)	1,216.68	1,150.25	1,083.82	1,017.39	950.96	884.53	818.10	751.66	685.23	618.80	552.37	485.94	419.51
	Scope 1+2 emissions (tCO2e)	3,042.47	2,876.35	2,710.23	2,544.12	2,378.00	2,211.88	2,045.76	1,879.64	1,713.52	1,547.40	1,381.28	1,215.16	1,049.04
